

PROFILE

Computer Science Engineering graduate who takes AI past the notebook and into systems people can use: gesture- and voice-controlled computing, real-time emergency-vehicle detection and NLP content moderation. Combines hands-on ML engineering with product and design thinking, and lead a student tech community where my role is mentor, speaker and hackathon organizer.

96%	4,744	1,519	3

Selected Projects

AuraOS · Multimodal AI Operating Layer [Code](#)

Python · OpenCV · MediaPipe · Whisper · LLMs

- Architected a 55-module Python system that lets people control a computer with hand gestures and voice, routing every command through intent detection, planning and safety checks before OS automation.
- Recorded and labelled a balanced 4,744-sample dataset across 8 gesture classes; the gesture model reports 96% accuracy.
- Designed 4 live views so users can always see whether the system is listening, thinking or acting.

ClearPath AI · Emergency-Vehicle Signal Priority [Code](#)

YOLOv8 · OpenCV · Python · Sep – Oct 2025

- Trained a YOLOv8 detector (50 epochs, 640 px input) on a custom 1,519-image annotated ambulance dataset.
- Built a real-time loop that watches 4 junction feeds in parallel, opens a temporary green corridor for a detected ambulance, then restores normal timing, with no in-vehicle hardware.

Sael (KAR) · Voice-First AI Headset Assistant [Code](#)

Python · Speech Recognition · Ollama · ElevenLabs · Nov – Dec 2025

- Built a hands-free assistant for accessibility: speech-to-text, command routing, a locally run LLM and spoken replies, each as a separately testable module.
- Added tone routing across 5 mood states and direct computer actions, with clear listening and error states.

Skills

AI & ML

Python, PyTorch, TensorFlow, YOLOv8, OpenCV, MediaPipe, scikit-learn, NLP, LLMs, RAG

DATA

Pandas, NumPy, Matplotlib, SQL, Tableau, EDA

ENGINEERING

Next.js, Flask, JavaScript, REST APIs, Git, Vercel

AUTOMATION & DESIGN

n8n, Ollama, ElevenLabs, Figma, Canva, UI/UX

Education

B.E. Computer Science Engineering

Lords Institute of Engineering and Technology, Hyderabad

CGPA 8.54

Intermediate

MS Junior College

CGPA 9.6

Experience

UI/UX Designer · Double Digits

May – Aug 2026

- **Maison Sale:** Designed a responsive UI/UX framework of reusable layouts, components and breakpoints, giving the product a consistent experience across mobile, tablet and desktop.
- **Qafila:** Owned the visual brand for local clothing labels, producing high-end product imagery that raised the store's perceived quality.
- Managed image assets in the back end, ensuring every product visual was correctly placed, sized and displayed across the storefront.

Project Developer & Mentor · Lords Skill Academy

Aug – Nov 2025

- Designed and built Python projects with OpenCV and Pygame used as hands-on teaching material.
- Mentored students from idea to working build, and supported programme research and scheduling.

Data Science & ML Intern · Pantech E-Learning

Sep 2024

- Built and compared ML classifiers predicting whether sound waves can extinguish a flame under different experimental conditions.
- Documented data preparation, model evaluation and findings in a 46-page report.

More Projects

Virtual Steering · Gesture Game Controller

[Code ↗](#)

Turned a webcam into a steering wheel: MediaPipe tracks 21 hand landmarks, wrist-angle geometry sets direction, and Windows scan codes drive the game. [Python](#) · [OpenCV](#) · [MediaPipe](#)

Women's Safety Insights · Social Data Mining

[Code ↗](#)

Mined large-scale Twitter data and applied sentiment analysis to surface and track women's-safety trends. [Python](#) · [NLP](#) · [Jupyter](#)

WSC Healthcare · Enterprise Website

[Live ↗](#)

Built a multi-page site for a healthcare AI company with a live-dashboard hero, interactive AI benchmark comparisons and 21 service pages. [Web](#) · [Vercel](#)

Leadership & Community

Lead, CodeWave Hub

Ran a student tech community: mentoring peers in AI and project development, hosting workshops and speaking on emerging tech.

Organizer, HackPrix

Helped organize a large-scale student hackathon.

Mentor, CodeDay Hyderabad

Guided young builders at the event hosted at NxtWave Academy.

Certifications

Artificial Intelligence Fundamentals
